

## Drive technology 2017 | 2018

Motor overview

**Nidec**  
All for dreams

## Innovation today, for mobility tomorrow

As a subsidiary of the Japanese Nidec Corporation, we pursue ambitious goals. With the development of innovative direct current motors and drives for industry and the automotive sector, we want to be the one setting the trends of the future. Our focus: Strong, optimally designed electric motors that can be used in a wide variety of ways thanks to their compact design.

The European headquarters of Nidec Motors & Actuators in Bietigheim-Bissingen can already

look back on 75 years of history as a production and technology centre, and call upon the comprehensive expertise and experience gained over all those years.

We come up with and achieve individual solutions and the highest quality standards thanks to our high-performance and fully-automatic production lines with a comprehensive final inspection and in this way ensure the efficiency and safety of our motors when used by our customers.

### Nidec in facts

Nidec Corporation	Turnover 2016 JPY 1.2 trillion
Employees	~ 100,000 globally
Nidec Motors & Actuators	Turnover 2016 ~ €170 million
Employees	1,097 globally

# Strong development for the highest product quality

Our globally networked Nidec know-how not only ensures the highest quality in our standard programme, but also makes us reliable partners for special solutions in different areas of application.

Our development team develops motors and transmissions in accordance with our customers' specifications and which we examine in great detail in our own test centres and laboratories. Our own sample and prototype construction makes us particularly flexible.

Beyond this, the high automobile-industry standards ISO 9001, ISO TS 16949, ISO 14001 and

ISO 5001, as well as our completely automatic inspection ensure the security and reliability of services. Not least because our motors are characterised by their high smoothness of running, long service life, robust design as well as electrical safety thanks to low voltage.

#### **Nidec test centre and laboratory**

- Noise and vibration measurement devices
- 3D measurement
- EMC measuring room
- Service-life test centre with climate chambers

# Areas of application

## Direct current motors without transmission

- Seat and furniture adjustment
- Logistics automation
- Office machines
- Bed adjustment

## Motors with spur gear transmission

- Roller shutter motors / building technology
- Spoiler adjustments
- Trailer adjustments
- Curtain adjustments
- Medical devices

## Motors with worm gear transmission (special solutions)

- Door motors
- Seat adjustments / furniture adjustments
- Antenna adjustment systems (SAT system)
- Laboratory devices
- Rehabilitation equipment (patient lifts)
- Window adjustment systems

## Motors with worm gear transmission

- Coffee machines / vending machines
- Garage door motors
- Central lubrication units
- Stair lifts
- Barriers and traffic systems
- Solar-panel adjustments

## Technical explanations

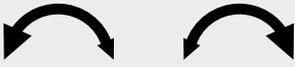

Changes and mistakes, also of a technical nature, are reserved. Please only use the quotation drawings as the construction basis for this reason. You receive this from your responsible representative. Some of the images in the catalogue do not comply with the DIN regulations! The indicated operating parameters refer to an ambient temperature of 20°C.

The motors included in the catalogue are not intended for the end consumer. In accordance with EU directives, these products do not require a CE Mark. Some motors could be customer-specific in design, and for this reason, are only available to be delivered under reservation and upon request.

## Terms, symbols and units in accordance with DIN

Symbols	Symbols / Example / Explanation
Art. no.	404 854
Nominal voltage	V ( $U_n$ )
Max. torque	Nm <sub>max</sub>
Idle speed	N <sub>0</sub> [min <sup>-1</sup> ] U/min
Nominal power	W ( $P_n$ )
Nominal current	A ( $I_n$ )
No-load current	A ( $I_0$ )
Max. power	A ( $I_{max}$ )
Hall sensors	N = no hall sensor / 1 = single hall sensor / 2 = dual hall sensor
Reduction	Transmission gear reduction in ratio
Gearwheel material	P = plastic / M = Metal
Thermal switch	Y = Yes / N = No
Interference suppression	Y = Yes / N = No
Transmission housing	lh = left transmission housing / rh = right transmission housing
Characteristic curve	Characteristic curve in accordance with quotation drawing
Shaft	Shaft drawing in accordance with quotation drawing
Electric power connection	Electrical contacts in accordance with quotation drawing

Please note that you can find detailed information on our quotation drawings.

	<p>Rotation direction when looking at the motor shaft</p>	<p>The characteristic curve shows the rotation speed and the power depending on the torque. It entails medium values at room temperature. Deviations of ± 10% are possible in the series.</p>
	<p>left                      right</p>	<p><b>Preferred rotation direction:</b> Motors with worm gear transmission have a preferred rotation direction that is illustrated with a large arrow in the drawings. If the motor turns in the opposite direction of the preferred rotation direction, the power output falls by approximately 10%.</p>

## Characteristic curves

CR	Constant Rotation
SO	Short Operation
VSO	Very Short Operation
P	Power output in Watt
$P_{2N}$	Nominal power output in Watt
$P_{2max}$	Maximum power output in Watt
$P_{2SO}$	Power output in short operation in Watt
$P_{2VSO}$	Power output in very short operation in Watt
M	Torque in Nm
$M_A$	Starting torque in Nm
$M_N$	Nominal output torque in Nm
$M_{SO}$	Output torque in short operation in Nm
$M_{VSO}$	Output torque in very short operation in Nm
n	Rotation speed in $\text{min}^{-1}$

$n_0$	Idle speed in $\text{min}^{-1}$
$n_N$	Nominal rotation speed in $\text{min}^{-1}$
$n_{SO}$	Rotation speed in short operation in $\text{min}^{-1}$
$n_{VSO}$	Rotation speed in very short operation in $\text{min}^{-1}$
I	Current in A
$I_0$	No-load current in A
$I_A$	Starting current in A
$I_N$	Nominal current in A
$I_{SO}$	Current in short operation in A
$I_{VSO}$	Current in very short operation in A
$\eta$	Efficiency in %
$\eta_N$	Nominal efficiency in %
$\eta_{SO}$	Efficiency in short operation in %
$\eta_{VSO}$	Efficiency in very short operation in %

## Working area

# GMK · GML

As 12-volt and 24-volt motor with Interference suppression and hall sensors

## Technical description

Motor housing	deep drawn & corrosion protection
Magnetic field	Permanent magnet
Type of transmission	–
Transmission housing	–
Gearwheel material	–
Transmission lubrication	–
Mechanical interface	Drive shaft
Electrical interface	Stranded wires with plug
Sensor	–
Thermal protection	Optional
Interference suppression	Optional

## Applications

# DCK31

As 12-volt and 24-volt motor with Interference suppression and hall sensors

## Technical description

Motor housing	Sheet steel deep drawn & protected against corrosion
Magnetic field	Permanent magnet
Type of transmission	Worm gear transmission
Transmission housing	Zinc die casting
Gearwheel material	Plastic, metal
Transmission lubrication	Grease, permanent lubrication
Mechanical interface	Drive shaft
Electrical interface	Plug
Sensor	Optional
Thermal protection	Optional
Interference suppression	Optional

## Applications

### Industry

Garage door and door opener, pumps, lubricating technology, household devices, linear drives

### Automobile

Tailgate adjustment

# Nidec Group – Leading in the world of electric motors

Nidec is the worldwide number 1 in the manufacturing of electric motors and their application in “everything that spins and moves”.

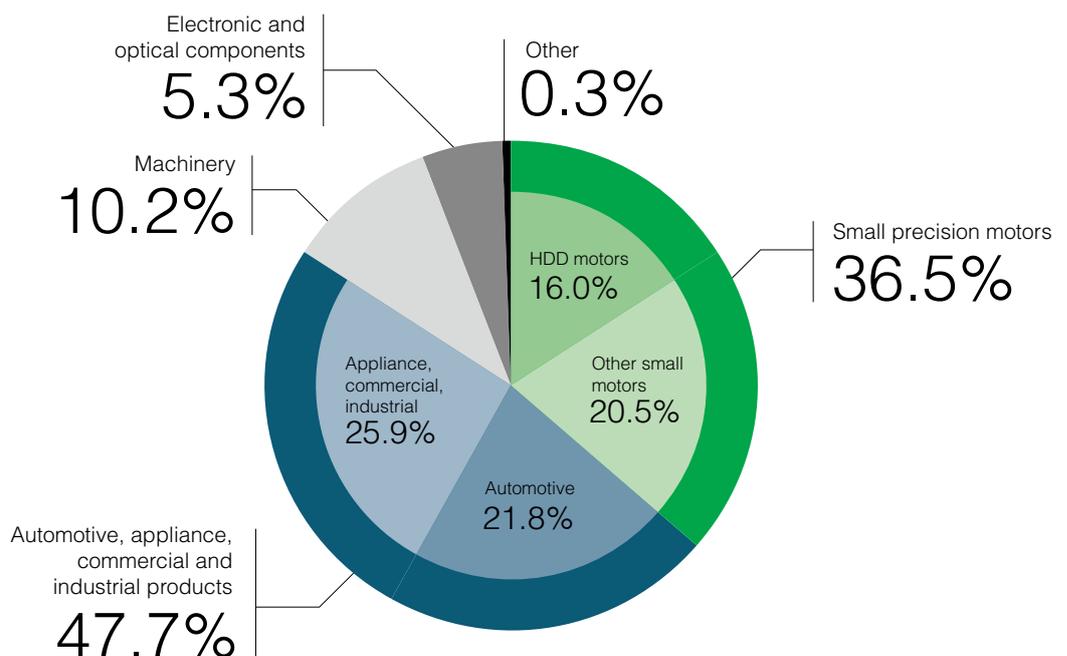

The product range consists of a massive spectrum of small precision motors through to large motors for different areas of deployment.

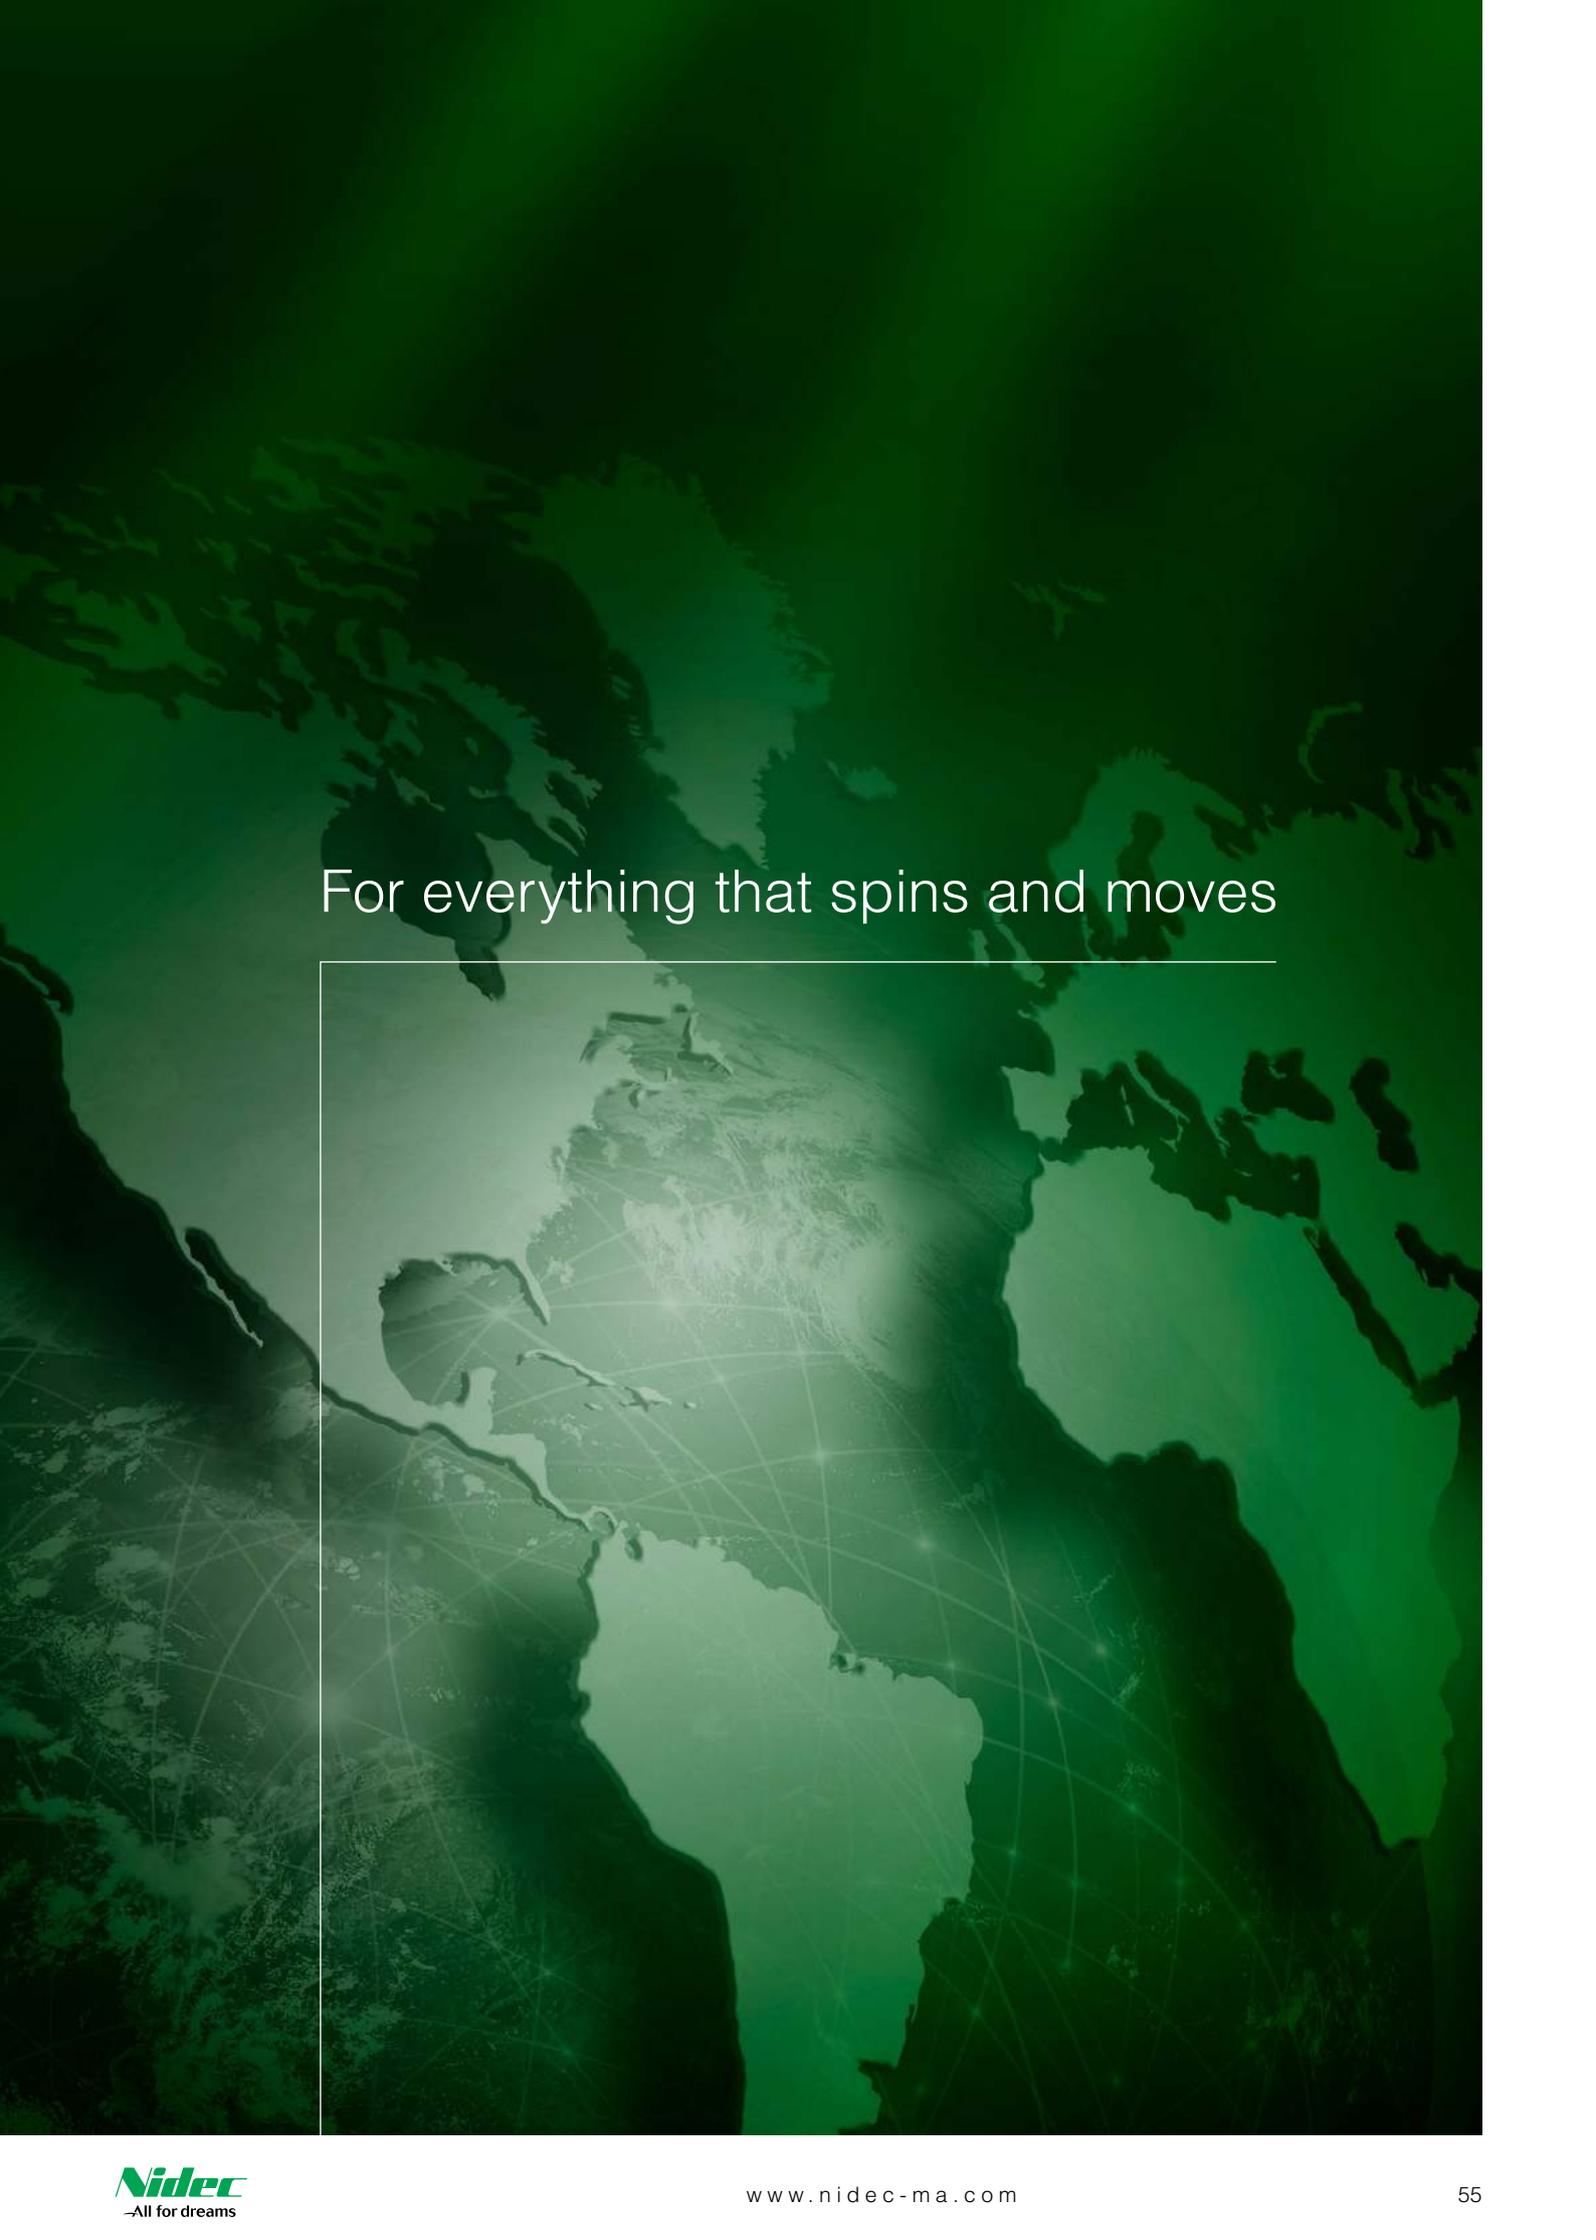

Nidec operates a network of around 300 international companies and is well connected with all relevant industries. Each member of the group contributes to the ambitious growth goals with

their high technical potential and specific competitive advantages. For the past 40 years Nidec has single-mindedly pursued the goal of being the number one on the market.

We have been able to achieve this with passion and enthusiasm for what we do, perseverance in the permanent optimisation of our products and applications, as well as a strong commercial identity that connects us throughout the globe and which is always pushing us to top performance.
